

### Evaluation Methods for Rural Health Programs

- Evaluation 101 – theory & SORH reality
- Focus on SORH – other rural health programs
- Resources – including each other
- Look at your workplans

---

---

---

---

---

---

---

---

### Project Evaluation

“A systemic approach of social research procedures”

“To ascertain or fix the value”

OR

So far so good so what?!

---

---

---

---

---

---

---

---

### Why does program evaluation matter to SORH?

- Golden rule!
- Management tool for improving your program.
  - Engagement, budget, strategic use of resources
- Documents your success!
  - Dissemination activity

---

---

---

---

---

---

---

---

Key questions about evaluation for SORH

- What is required?
- What is “budgeted”?
- What data do we have or can we easily get?
- What do we want to know about what we do that we don’t know now?

---

---

---

---

---

---

---

---

Evaluation 101: Steps  
(in theory according to CDC)

1. Engage Stakeholders
2. Describe the Program
3. Focus on the Evaluation Design
4. Gather Credible Evidence
5. Justify Conclusions
6. Ensure Use and Share Lessons Learned

Source: CDC

---

---

---

---

---

---

---

---

Evaluation 101: Reality Starting point for SORH  
the needs of rural communities and providers

**SOURCES OF DATA and ENGAGEMENT:**

- Surveys and questionnaires
- Federal, state and county data
- Provider data
- Key Informant Interviews
- Focus groups
- Community meetings
- Foundations
- Economic development authorities
- Human service agencies
- Medicaid – CHIP
- State legislatures
- Associations
- Universities
- Research centers
- Other funded projects

---

---

---

---

---

---

---

---

Evaluation 101: Evaluation Design Reality for SORH

- What's required: SORH core activities & PIMS measures
- Identify what resources can be "put in" to make a difference on those needs
- Determine the desired outcome
- Strategize the activities which will achieve the desired outcome

---

---

---

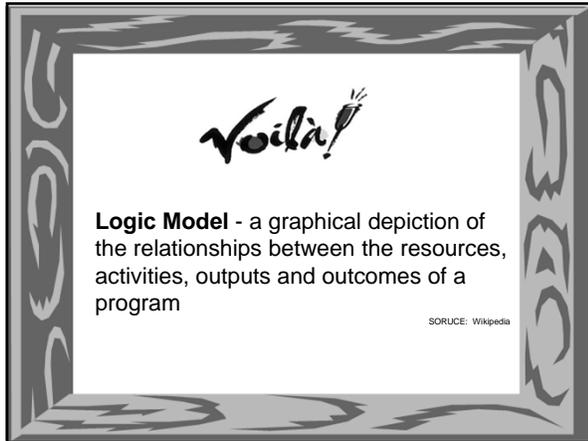

---

---

---

---

---

---

---

---

---

---

---

---

---

Evaluation 101: Evaluation design & logic model

- **"If-Then"**
- IF the resources are available for a program,
- THEN the activities can be implemented,
- IF the activities are implemented
- THEN certain outputs and outcomes can be expected

SOURCE: Wikipedia

---

---

---

---

---

---

---

---

**Evaluation 101: Evaluation design selecting the measures (theory**

- **Output measures – “process” activity**
  - Did you do what you say you were going to do?
    - Example – conduct webinar for rural health facilities
- **Outcome measures – result of activity**
  - What difference did it make?short, intermediate, long-term
    - Example - rural health clinics report new knowledge on NHSC resources
- **Impact measures - change**
  - So what?
    - Example – rural health clinics uses NHSC SLRP funds as a recruitment tool and successfully recruit a PA

---

---

---

---

---

---

---

---

---

---

**Evaluation 101: Evaluation design in the work plan**

Work Plan should be clear, coherent and aligned with the goals and objectives described in the Methodology section. To accomplish this, applicants are strongly encouraged to present a matrix that illustrates the following:

- Activity
- Date of completion
- Staff (or responsible entity)
- Progress or Process measures
- Outcome or Impact

---

---

---

---

---

---

---

---

---

---

**Evaluation 101: Workplan is evaluation design**

**GOAL: ASSIST IN THE COORDINATION OF HEALTH CARE DELIVERY THROUGH THE DEVELOPMENT OF STATE LEVEL RURAL HEALTH LEADERSHIP**

*Objective 1. Support the sustainability and vitality of SORHs by promoting SORH promising practices*

Activities	Responsibility	Estimated Completion	Process Outcome and Impact Measures
Identify SORH with promising practice during regional calls, meetings and learning communities	Education & Services Director Branch Editor	Ongoing	At least 12 promising practices are identified and documented
Survey SORH regarding their promising practice work and their use of the SORH promising practices		November 2013 and August 2013	SORH read about promising practice in Branch newsletter
Document the promising practice by writing up a summary		Ongoing Monthly	SORH read about promising practice on NOSORH website
Disseminate information on the promising practice via website & newsletter		April 2014 and August 2014	5 SORH report adopting a promising practice
Collect & report data on newsletter reading and website hits on SORH showcase			

---

---

---

---

---

---

---

---

---

---

Evaluation 101: Evaluation design in workplan

- Goals are general broad statements (use core activities)
- Objectives are operational statements (SMART)
- Activities are what you will do

---

---

---

---

---

---

---

---

Evaluation 101: Evaluation design in the narrative

*EVALUATION AND TECHNICAL SUPPORT CAPACITY*

- Applicant must describe the strategies and measures that will be used to evaluate performance during the project period. The applicant should describe how progress toward meeting grant-funded goals will be tracked, measured, and evaluated. Explain any assumptions made in developing the project work plan and discuss the anticipated performance measures and desired outcomes of grant-funded activities. Describe the data collection strategy to collect, analyze and track data to measure performance and determine impact or outcomes. Explain how the data will be used to improve performance. Discuss use of any automated or web-based performance measurement reporting system (i.e. TruServ).

---

---

---

---

---

---

---

---

Evaluation 101 – Evaluation design in the program narrative

“The project will be evaluated by systematically examining and collecting data on outputs and short term outcomes which can be achieved in the project year.”

- Who will be responsible for data collection
- What data will be collected from where
- When will the data be collected and compiled
- Who and when will the data be analyzed
- How will the results of the data analysis be used?

---

---

---

---

---

---

---

---

### Evaluation 101: How important is evaluation design for SORH?

- **Criterion 3: Evaluative Measures - 5 points**  
*The extent to which the application clearly describes the strength and effectiveness of the method proposed to monitor and evaluate the project results and provides specific evidence that the evaluative measures will be able to assess to what extent the program objectives have been met.*
- **Criterion 4: Impact - 5 points**  
*The extent to which the activities proposed in the Work Plan are clear, specific and contribute to the accomplishment of each objective; and reasonably achievable, given the level and experience of staff, resources available and length of the project period to carry out the proposed activities.*

---

---

---

---

---

---

---

---

---

---

### Evaluation 101: Gather credible evidence

- Appoint a staff person to lead and encourage
- Regular timeline for compiling and analysis
- Use Tru-Serve to track (or set up spreadsheet and a file folder)

---

---

---

---

---

---

---

---

---

---

### Evaluation 101: Gather credible evidence

### Evaluation 101: Ensure Use & Share Lessons

#### ORHP Performance Measurement Information System (PIMS)

- ORHP has developed a broad range of performance measures based on past grantees' focus areas to assess the impact that ORHP programs have on rural communities and to enhance ongoing quality improvement. ORHP has incorporated these performance measures as a requirement for all ORHP grant programs in order to achieve the stated objectives. Grantees are required to report on the Performance Improvement Measurement System (PIMS) through HRSA's Electronic Handbook (EHB) after each budget period.
- Grantees must submit responses to #1 and #2 (below) directly into PIMS via the Electronic Handbook (EHB) no later than 60 days following the end of each twelve month budget period.
- 1) Report the total number of technical assistance (TA) encounters provided directly to clients within your State by SORH. Provide a breakdown of different types of TA provided. Any type of TA not listed in EHB should be counted as "other".
- 2) Report the total number of clients (unduplicated) within your State that received technical assistance directly from SORH. Provide a breakdown of different types of clients that received TA. Any type of client not listed in EHB should be counted as "other".

---

---

---

---

---

---

---

---

---

---

### Evaluation 101: Ensure Use & Share Lessons Learned

From Alana Knudson

- Analyze Program Trends
  - Measure Performance Over Time
  - How Are We Doing Compared with Last Year?
  - What Goals Do We Want to Set for Next Year?
- Educate and Engage Staff
  - What Can We Realistically Achieve?
  - What Specific Areas Can We Improve?
- Engage Stakeholders, Policy Makers and Funders
  - Use Data to Tell the Story of How You are Making a Difference
  - What is the Impact of our Program?

---

---

---

---

---

---

---

---

---

---
