

Impact on Health System Market Changes on Rural Health: ACO, PCMH, VBP Consolidation

Presentation to the State Offices for Rural Health - Region A Meeting
Providence, RI
June 19, 2013

Keith J. Mueller, Ph.D.
Director, RUPRI Center for Rural Health Policy Analysis
Head, Department of Health Management and Policy
College of Public Health
University of Iowa

Importance of Transitions to Optimize Opportunities

- Changes are coming, under auspices of reform or otherwise
- Implement the changes in the context of what is desirable for rural communities
- How do we pull that off?

2

The Changing Landscape

- **\$\$** must be squeezed out of current health care expenditures: 20+% of GDP by 2020 is not acceptable
- **Both** price and quantity of services must be reduced
- Changes will happen in the delivery system, fundamental not cosmetic
- For health systems, **PRESSURE TO GROW AND SUSTAIN PATIENT VOLUME**

3

Coincidental Presence of Models for Change (old and new)

- Prevention and population health
- Community well-being
- Patient-Centered Medical Home
- Bundled payment
- Value based purchasing
- Managed care organizations
- Accountable care organizations

Demands for service will shift

- Expansion of Medicaid enrollment with some federal help in paying providers, but limited
- Expansion of enrollment in the individual and small group markets
- CAN'T EXPECT CURRENT / HISTORIC APPROACHES TO DELIVERING AND FINANCING CARE TO RESPOND TO THIS SHIFT

Changes in Finance / Payment: Value based purchasing

- Inpatient payment to PPS hospitals effective October 1, 2012
- Will be developed for outpatient payment
- Demonstration project for CAH payment
- Value based modifiers for physician payment

Future Should be: RUPRI Health Panel Vision

The RUPRI Health Panel envisions rural health care that is affordable and accessible for rural residents through a sustainable health system that delivers high quality, high value services. A high performance rural health care system informed by the needs of each unique rural community will lead to greater community health and well-being.

7

Should be: Foundations for Rural Health

- **Better Care:** Improve the overall quality, by making health care more patient-centered, reliable, accessible, and safe.
- **Healthy People/Healthy Communities:** Improve the health of the U.S. population by supporting proven interventions to address behavioral, social, and, environmental determinants of health in addition to delivering higher-quality care.
- **Affordable Care:** Reduce the cost of quality health care for individuals, families, employers, and government.

8

Why is Rural Different?

- Same Triple Aim goals same as everywhere:
 - Better care
 - Better health
 - Lower cost
- But there are persistent rural priorities
 - Access to services (includes how to finance)
 - Community focus (IOM report of 2005)
 - Innovative use of personnel and facilities

9

A High Performance Rural Health Care System Is

- **Affordable:** costs equitably shared
- **Accessible:** primary care readily accessible
- **Community-focused:** priority on wellness, personal responsibility, and public health
- **High-quality:** quality improvement a central focus
- **Patient-centered:** partnership between patient and health team

Central points from RUPRI Health Panel regarding change

- Preserve rural health system design flexibility: local access to public health, emergency medical, and primary care services
- Expand and transform primary care: PCMH as organizing framework, use of all primary care professionals in most efficient manner possible

Continued

- Use health information to manage and coordinate care: records, registries
- Deliver value in measurable way that can be basis for payment
- Collaborate to integrate services
- Strive for healthy communities

Innovate to accelerate pace of change

- In health care work force: community paramedics, community health workers, optimal use of all professionals, which requires rethinking delivery and payment models – implications for regulatory policy including conditions of participation
- In use of technology: providing clinical services through local providers linked by telehealth to providers in other places – E-emergency care, E-pharmacy, E-consult
- In use of technology: providing services directly to patients where they live

The future can be healthy people in healthy communities

- Through local providers linked to integrated systems of care
- Who, together with their patients, manage health conditions
- Not the same design everywhere, but the high quality, patient-centered everywhere

Health Care Organizations of the Future

- Accepting insurance risk
- Focus on population health
- Trimming organization costs
- Using the data being captured (e.g., electronic health records)
- Health care as retail business

Considerations

- Evolving service system (e.g., telehealth)
- Workforce: challenges to fill vacancies, and shifts to new uses of new categories
- Best use of local assets; including physical plant (the hospital)

16

Local Assets to Consider

- Raw material
- Data and information
- Connectivity
- Core capabilities, e.g., primary care
- Leadership

17

Elements of a Successful System Redesign

- Clear Vision
- Principles for redesign (reliability, customization, access, coordination)
- Teamwork
- Leadership
- Customer focus
- Data analysis and action plans
- Inclusive beyond health care system

Source: Pursuing the Triple Aim, Bloogiano and Kenney, Jossey-Bass, 2012.

18

Changes in delivery system: Patient-Centered Medical Homes (PCMH)

- Not your father's "medical home"
- Potential future of primary care
- Emphasis on integrated services, management of chronic conditions, team-based, patient-centered care

19

Core Features of PCMH

- Personal physician (some believe APNs)
- Physician-directed medical practice (ditto)
- Whole person orientation
- Care coordination and/or integration
- Quality and safety
- Enhanced access (timely and convenient)
- Payment for the value added

Source: James M Gill, "Reducing Hospital Costs by Means of Enhanced Primary Care." *Prescriptions for Excellence in Health Care*. Summer, 2011. Jefferson School of Population Health and Lilly USA, LLC.

20

PCMH Readiness

- From 2008 data: 41% of all primary care practices offer minimal or no PCMH services
- Large practices do better; in non-metro areas 18.8% meet 7 "must pass" elements vs. 4.5% of small practices – metro is 17.4% v. 9.6%

Source: Fred A Ullrich, A Clinton MacKinney and Keith J Mueller, "Are Primary Care Practices Ready to Become Patient-Centered Medical Homes?" *The Journal of Rural Health* 29 (2013) 180-187.

21

Bundled Payment in Rural Places?

- May improve quality of care but impact likely to be unevenly distributed (geography and care systems)
- May lead to provider consolidation
- Incorporating CAHs challenging and may not work
- May need safeguards to protect rural consumer choice and patient/provider relationships

Source: Robert Town, Walter Gregg, Ira Moscovice, Shailendra Prasad, and Jill Klinger. "Will Bundling Work in Rural America? Analysis of the Feasibility and Consequences of Bundled Payments for Rural Health Providers and Patients." *Policy Brief* (September, 2011). Upper Midwest Rural Health Research Center.

22

Changes in the delivery system: Accountable Care Organizations (ACO)

- Including Medicare Shared Savings Program (MSSP)
- Including Pioneer Demonstration from Centers for Medicare and Medicaid Innovation (CMMI)
- CMMI anticipates doubling in 2013
- And much more.....

23

Tally Sheet

- 32 Pioneer ACOs
- 220 MSSP ACOs
- 32 are Advanced Payment
- more than 400 total ACOs; in 48 states

Source: MedPAC presentation by David Glass and Jeff Stensland. April 4, 2013

24

Serving Millions

- 21-31 million Americans receive care through ACOs
- 2.4 million in Medicare ACOs (more than 3 million after January 2013)
- 15 million non-Medicare patients of Medicare ACOs
- 8 to 14 million patients of non-Medicare ACOs

Source: "The ACO Surprise" by Niyum Gandhi and Richard Weil. Oliver Wyman, Marsh & McLennan Companies. 2012. http://www.oliverwyman.com/media/OW_ENG_HI_S_PUBI_The_ACO_Surprise.pdf

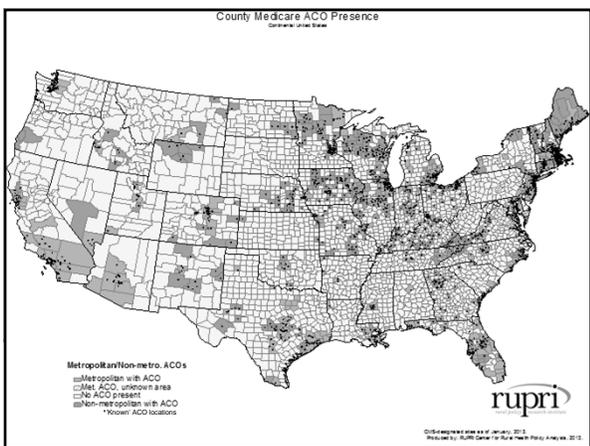

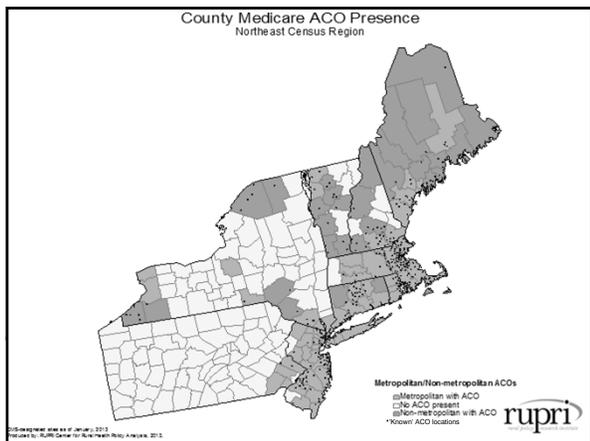

Medicare ACOs in Rural Places

- Medicare ACO presence in 16% of nonmetropolitan counties
- 85 Medicare ACOs with beneficiaries assigned to them from 331 nonmetropolitan counties in 37 states

Source: RUPRI Center for Rural Health Policy Analysis estimates based on data collected from Medicare ACOs

Core Components of An ACO

- People-centered foundation
- Health home
- High-value provider network
- Population health and data management
- ACO leadership
- Payer partnership

rupri THE UNIVERSITY OF IOWA 29

The World According to Payers, 2016 and Beyond

- Revenue reduced for readmissions
- Must prove quality and cost to be part of network
- More patient shopping, even across rural hospitals
- By 2020 6% of Medicare payment tied to risk incentives: VBP, readmissions, hospital-acquired conditions

rupri THE UNIVERSITY OF IOWA 30

Transition Thinking

- Volume to value
- Group contract to patient service
- Care coordination across the continuum
- Patient centered care
- Lower costs

Continued

- From clinical care to health and health promotion
- From discharges to people enrolled in system and interactions with people
- Managing patients according to patient need across illness spectrum and continuum of care

Concluding with reminders of reality

- Payment per event will moderate
- Tolerance for services of questionable use will diminish
- Systems will form and spread
- Multiple payers moving in similar directions, opportunities to influence should be captured and exploited

Pursuing the possible

- When community objectives and payment and other policy align
- Community action is where policy and program streams can merge
- Community leadership a critical linchpin
- Pursuing a vision

34

Role for State Offices of Rural Health

- Community focus will require convening stakeholders that may not have done so
- Providing and brokering technical assistance
- Full utilization of available demonstration and pilot project support
- Helping understand influence of payment and regulatory policies
- Other?
