The Plymouth Regional High School Interact Club and Plymouth Pediatric and Adolescent Medicine are pleased to share the CDC’s 2022 recommended immunization schedule for Children 7-18 years old.

The Interact Club is a rotary-sponsored service club for high school students. It offers young people an opportunity to participate in fun, meaningful service projects while developing leadership skills and discovering the power of service.

This effort is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of awards totaling $98 million with 0% financed with nongovernmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, not an endorsement, by HRSA, HHS, or the U.S. Government. For more information, please visit HRSA.gov.

Do you have questions about a child or adolescent vaccine? Call Plymouth Pediatric & Adolescent Medicine at 603-536-3700.

**More Information:**
- Everyone 6 months and older should get a flu vaccine every year if they do not have contraindications.
- All 11- through 12-year olds should get one shot of Tdap.
- All 11- through 12-year olds should get a 2-shot series of HPV vaccine. A 3-shot series is needed for those with weakened immune systems and those who start the series at 15 years or older.
- All 11- through 12-year olds should get one shot of meningococcal conjugate (MenACWY). A booster shot is recommended at age 16.
- Ages 10 years and older at increased risk should receive a serogroup B meningococcal (MenB) vaccine. Ages 16–18 years old who are not at increased risk may be vaccinated with a MenB vaccine.
- Ages 9-16 years who live in dengue endemic areas AND have laboratory confirmation of previous dengue infection should receive a serogroup B meningococcal (MenB) vaccine.

**COVID-19 vaccination is recommended for ages 5 years and older.**

Talk to your child’s doctor or nurse about the vaccines recommended for their age.

These shaded boxes indicate when the vaccine is recommended for all children unless your doctor tells you that your child cannot safely receive the vaccine.

These shaded boxes indicate the vaccine SHOULD be given if a child is catching up on missed vaccines.

This shaded box indicates children not at increased risk MAY get the vaccine if they wish after speaking to a provider.

This shaded box indicates children not at increased risk may get the vaccine if they wish after speaking to a provider.
